ISLAND OF KORČULA

Korčula is an island in Southern Dalmatia which is 46.8 km long, covering an area of 276 km square. It is only 1,270 m away from the Pelješac Peninsula. It is the second largest Croatian island with around 16,000 inhabitants.

The Island of Korčula is connected by ferry lines with the Pelješac Peninsula and the Town of Split, and catamaran lines connect it with the Town of Dubrovnik and the islands of Hvar, Mljet, Brač and Lastovo. It is only 2 hours' drive from Dubrovnik airport.

The contours of the Island of Korčula, are almost black due to its dense oak, holm-oak and pine forests. The Island was colonised by the old Greeks who called it *Black Korčula* (Greek *Korkyra Melaina*; lat. *Korkyra Nigra*). A legend has it that Korčula was first discovered by the Greek hero Antenor while fleeing from the City of Troy.

Korčula is an ideal island for active holiday with 2,700 hours of sun annually and with typical Mediterranean climate. The average summer temperature is 26.9°C, while the average temperature in winter is 9.1°C.

Among the 25,000 known species of orchid in the world, only one percent grows in Europe, and 49 different orchid species can be found on the Island of Korčula.

In the local waters of Korčula, one can often see dolphins playing and the waters are known for its abundance of sea flora and fauna which attract numerous divers.

OTOK KORČULA

Korčula je južnodalmatinski otok duljine 46,8 km i površine od 276 četvornih kilometara, udaljen od poluotoka Pelješca 1270 metara. Drugi je po veličini hrvatski otok sa oko 16000 žitelja.

Otok Korčula je povezan trajektnim linijama s poluotokom Pelješcem i Splitom te katamaranima s Dubrovnikom i otocima: Hvarom, Mljetom, Bračem i Lastovom. Od zračne luke u Dubrovniku udaljen je samo dva sata vožnje cestom.

Otok čiji su obrisi gotovo crni zbog guste šume hrasta, česvine i bora, kolonizirali su još stari Grci, nazvavši ga

„Crnom Korčulom“ (grč. *Korkyra Melaina*; lat. *Korkyra Nigra*), a prema legendi prvi ga je otkrio grčki junak Antenor bježeći iz Troje.

Sa 2.700 sunčanih sati godišnje i obilježjima mediteranske klime, otok Korčula je idealan za aktivnosti na otvorenom. Prosječna ljetna temperatura zraka je 26,9°C a zimska 9,1°C.

Od ukupno 25 000 poznatih vrsta orhideje u svijetu, samo jedan posto raste u Europi. Od toga, na Korčuli uspijeva 49 različitih vrsta orhideje.

U akvatoriju otoka Korčule često se viđaju skupine dobrih dupina, a poznato je po obilju morske flore i faune, što privlači brojne ronioce.

THE HISTORY OF THE ISLAND

TAKE A PEEK INTO THE PREHISTORIC TIMES – VISIT **#VelaSpilaCave**

The Vela Spila Cave (*cro-Vela Spila*) is located on the southern slopes of the hill above Vela Luka. It can be reached by car or on foot. The area in front of the cave is an excellent viewpoint. The cave itself is considered one of the most important archaeological sites of such type in the Mediterranean. Ten meters thick sediments have been formed over the years, abundant with archaeological remains providing evidence for the existence of life since the last ice age (20,000 B.C.). Many years of excavations have shown dramatic changes in the terrain, climate, flora and fauna in the area, as well as in the way in which people have adapted to the new conditions. The items found in the cave can be seen at the Cultural Centre in Vela Luka.

Dugogodišnjim istraživanjima stečen je uvid u dramatične promjene reljefa, klime, biljnog i životinjskog svijeta kroz koje je prolazio okoliš te ljudsku prilagodbu novim okolnostima. Predmeti pronađeni u špilji mogu se razgledati u Centru za kulturu Vela Luka.

TRAVEL INTO THE PAST **#LumbardaPsephism**

The exhibition at the Korčula Town Museum features the copy of the Psephism of Lumbarda found in the 19th century in Lumbarda. It is a historical document of a decision of the National Assembly of Hellenic colony of Issa (the present-day town of Vis) on the reached agreement with the local chieftains on the development of the settlement and distribution of the land carved on a stone slate. It is a well-preserved item, containing precise provisions on the rights of the settlers and 180 signatures.

PUT U PROŠLOST **#LumbarajskaPsefizma**

U prizemlju Gradskog muzeja izložena je kopija Lumbarajske psefizme nađene u 19. st. u Lumbardi. Radi se o uklesanoj odluci narodne skupštine helenističkog polisa Issa (danas grad Vis) o postignutom dogovoru s lokalnim poglavcima o osnutku naselja i podijeli zemlje uklesanoj na kamenoj ploči. Odličnom očuvanošću, preciznošću odredaba koje govore o pravima naseljenika, potpisima njih oko 180, ovaj jedinstveni spomenik svjedoči o snažnoj komponenti helenske tradicije otoka Korčule.

TRAVEL INTO THE PAST **#Kopila**

The Kopila Hillfort is situated on a steep hill above the Blato field on the west side of the Island. The peak of its settlement dates back to the period between the end of the 4th and the end of the 1st century B.C. It is important primarily due to its architectural complex of a necropolis with unique monumental tombs.

THE STATUTE OF THE ISLAND AND THE TOWN #Korculalsland

The Statute of the Town and the Island of Korčula dating back to the 13th century is one of the oldest legal documents written in Slavic languages. The experts believe that it was drafted in 1214, with modifications made to it until the 16th century. The oldest part of the Statute is written in the Medieval Latin. The Statute was printed in Venice in 1643. Two old manuscripts of the Statute have been preserved.

It is interesting to mention that the provisions of the Statute were in force until 1815.

STATUT OTOKA I GRADA #OtokKorčula

Statut grada i otoka Korčule (13. st.), jedan je od najstarijih pravnih slavenskih dokumenata. Stručnjaci smatraju da je donesen 1214. godine, a reformacije su mu dodavane do sredine 16. stoljeća. Najstariji dio Statuta pisan je srednjovjekovnim latinskim jezikom. Tiskan je u Veneciji 1643. godine. Sačuvana su dva stara rukopisna primjerka Statuta.

Zanimljivo je napomenuti da su odredbe Statuta pravno bile na snazi do 1815. godine.

#Korculabrotherhoods

There are three brotherhoods in the Town of Korčula, such as: All Saints (cro. *Svi Sveti*) (founded in 1301), St. Roch (cro. *Sv. Roko*) (founded in 1575), and St. Michael (cro. *Sv. Mihovil*), i.e., the Brotherhood of Our Lady of Consolation, or of the Cord (cro. *bratovština Djevice Marije od utjehe – pojasa*) (founded in 1603). The brotherhoods take part in the processions throughout the year. The most impressive are those taking place during the *Holy week* and *Easter Friday* and during the Feast of St. Theodor (celebrated on July 29th), the patron saint of the Town of Korčula. During these festivities, the brotherhoods bring their torches, processional candlesticks, crosses and other liturgical ornaments.

#Korčulanske bratovštine

U gradu Korčuli postoje tri bratovštine: Svih Svetih (1301.), Sv. Roka (1575.) i Sv. Mihovila ili Blažene

Djevice Marije od Utjehe-Pojasa (1603.). Bratovštine sudjeluju u procesijama tijekom cijele godine, od kojih su najdojmljivije tijekom Vele setemane i na Veli petak te za Blagdan Sv. Todora (29. srpnja), nebeskog suzaštitnika grada Korčule, kad se iz bratimskih dvorana iznosi veli vosak – torci, cereferali, križi i sav sjajni liturgijski nakit koji bratovštine imaju.

DISCOVER MEJE #Stoneheritage

Meje are dry stone terraces built using a dry stone walling technique for the purpose of an intensive cultivation of wine, olives and other agricultural products. The art of dry stone walling is protected as intangible heritage of the Republic of Croatia.

Vrtujci and *torete* are also built using a dry stone walling technique – by paving stone slabs in a circle. There are more than 15 of such structures that can be found in the vicinity of Vela Luka. The largest one is located in Gornja Njivica and is 4.23m tall. *Torete* (5) can be found in wine yards in Smokvica.

„Vrtujci“ i „torete“ građeni su također u tehnici suhozida – kružnim slaganjem kamenih ploča. U okolici Vele Luke ima ih više od petnaest, a najveći se nalazi u Gornjoj Njivici i visok je 4,23 m. „Torete“, njih 5. mogu se pronaći u vinogradima Smokvice.

UNIQUE ISLAND TRADITION

#Moreska #Kumpanija and #Mostra

The Korčula Island sword dances of Moreška, Moštra and Kumpanija are protected as intangible cultural heritage of the Republic of Croatia and a unique island tradition. These attractive dances represent a battle between the local army and the conqueror. Moreška is a mock battle between two kings (the black and the white one) and their armies for the love of a girl, Bula.

Today they are performed during the summer months. Kumpanija is performed in Vela Luka, Blato, Smokvica, Čara and Pupnat. Moštra is performed in Žrnovo and Moreška in Korčula.

JEDINSTVENA TRADICIJA OTOKA

#Moreška #Kumpanija i #Moštra

Plesovi s mačevima **moreška**, **moštra** i **kumpanija**, otoka Korčule zaštićeni su kao nematerijalna baština Republike Hrvatske, kao jedinstvena tradicija otoka Korčule. Ti atraktivni plesovi prikazuju borbu između osvajača i domaće vojske, dok moreška uprizoruje borbu dvaju kraljeva (crnog i bijelog) i njihovih vojski za ljubav djevojke, Bule.

Viteški plesovi tradicionalno se izvode na blagdane svetaca zaštitnika mjesta. U sklopu **Festivala viteških igara** izvode se tijekom ljetnih mjeseci za brojne turiste. **Kumpanija** se izvodi u Veloj Luci, Blatu, Smokvici, Čari i Pupnatu. U Žrnovu se izvodi **moštra**, a u Korčuli **moreška**.

Tradicija vinogradarstva i vinarstva na otoku Korčuli traje od vremena starih Grka (4. st. pr.Kr). Otok Korčula poznat je po autohtonim sortama grožđa i vrhunskim bijelim vinima. Grk se uzgaja u Lumbardi, na istočnom dijelu otoka, dok se u središnjem dijelu uzgajaju Pošip i Rukatac u vinogradima Čare i Smokvice. Od crnih sorti najrašireniji je plavac mali. Degustirajte lokalna vina u autohtonom ambijentu vinarija na otoku Korčuli!

Donosimo Vam tekst o vinima otoka Korčule g.đe Maje Cebalo:

We wish to take you on a *Gourmet Tour Around Korčula*, as **Veljko Barbieri** calls it in his text. Here below is an excerpt from the text:

As the natural beauty and the rich cultural and ethnological diversity shape the island of Korčula, it owes its appearance to the local cuisine, as well. The traditional dishes are included into an entire cookbook containing the original recipes. We will start our tour with a dish named *Korčulanska paštica*. It is a Korčula-style beef stew evoking the scent of both the antiquity and medieval times, a dish very popular in Dalmatia. It is hard to imagine the menus of the island without *Žrnovski makaruni*, a famous home-made pasta typical of the island. In Korčula, it is served with meat and fish sauces.

(...)Cultural and civilisation influences of many nations came from the sea. People lived off the sea and with the sea. Therefore, it is no surprise that Korčula cuisine is replete with a variety of fish dishes, the most popular one being *Popara*, a special kind of fish stew, similar to other local fish stew dishes, such as *lešada* and *brodet* (...)

Kako bismo vas povelili na „Gastronomsku šetnju Korčulom“, donosimo izvratke iz istoimenog teksta Veljka Barbierija:

„Kao što prirodne ljepote, bogato kulturno i etnološko nasljeđe određuju fizionomiju Korčule, tako je određuje i njezina gastronomija, od čijih jela je ovaj otok ispisao cijelu malu izvornu kuharicu. Našu šetnju započinjemo kulturnim jelom, Korčulanskom pašticadom, u kojoj podjednako miriše antika i srednjovjekovlje, kulinarskom općem mjestu Dalmacije, ali koje se ovdje izdvaja po kakvoći, ali i po nijansama u načinu pripreme. Jelovnik ovog otoka nezamisliv je bez Žrnovskih makaruna, kultne otočke tjestenine nastale na prijelomu stoljeća, a koju Korčulani miješaju s mesnim i ribljim umacima u svojim gradovima, ali i manji mjestima...

...S mora su dolazili kulturni i civilizacijski utjecaji, od mora se živjelo, more je hranilo. Nije onda ni čudo što korčulanska kuhinja obiluje i bogatim jelovnikom jela od ribe, među kojima se posebno ističe popara, složena od različitih vrsta ribe, gastronomski rođak korčulanskih lešada i brodeti.

Some thousand family farms produce olive oil. In 2016, Korčula olive oil received a prestigious certificate of the protected designation of origin and the protected geographical indication at the EU level.

#Lumblija

umblija is a cake made from yeast-leavened dough that owes its distinctive taste to the dedication and love needed for the long process of its preparation and baking, but of course also to its special ingredients that are picked during the summer: it contains almonds, walnuts, raisins, orange and lemon, various spices added in carefully defined proportions, and the dessert's essential ingredient, varenik, a syrup made from must ("young wine") that is slowly cooked for several hours until reduced to a dark sweet syrup.

Life is sweet with home-made cakes and pastry, such as: *cukarini* (crescent-shaped biscuits), *klašuni* (pastry stuffed with walnut filling), *rozata* (caramel flan), *arancini* (candied orange peel), *bruštulani mindeli* (candied almonds), *dried figs*, *lojenica* (dripping cake), *sirnica* (Easter sweet bread) and *lumblia*, accompanied by a glass of prosecco and a scented brandy made of herbs, carobs and roses.

Lumbarda je smještena na istočnom dijelu otoka, 6 km od grada Korčule. Ima oko tisuću stanovnika. Sastoji se od nekoliko zaselaka duž obale, malih uvala i brežuljaka okruženih vinogradima te oduševljava svojom ljepotom, a posebno pješčanim plažama.

Arheološki ostaci ukazuju na to da su Grci ovdje osnovali poljoprivredna naselja. Dokaz tomu je Lumbaradska pšezfiza iz 4. stoljeća prije Krista, čija se replika može vidjeti u Gradskom muzeju Korčula. Stoljećima se stanovnici Lumbarde bave ribolovom i poljoprivredom, posebno vinogradarstvom.

ŠTO POSJETITI I VIDJETI

- „Kašteli“ (ljetnikovci) korčulanskih obitelji, iz 16. st.
- crkvice i kapele, od kojih neke potječu iz 18. st.,
- vinarije - u Lumbardi se uzgajaju dvije prepoznatljive sorte vina – plavac i grk - koji daju vrhunska vina,
- Lumbarda je rodno mjesto dvaju poznatih kipara: Frana Kršinića i Ive Lozice.

#TownKorcula

The Town of Korčula is one of the best-preserved medieval towns in the Mediterranean. It is a tourist and culture centre of the Island of Korčula.

The Town is situated on the north-eastern side of the Island bearing the same name. Together with Čara, Račišće, Pupnat and Žrnovo, it has got 5,700 inhabitants. Korčula is only 1,270 m away from the Pelješac Peninsula with which it is well connected by ferry and catamaran lines.

Korčula is the birth place of Marco Polo (1254-1324) who was captured in the Korčula archipelago on September 7th, 1298 during a naval battle between Genoa and Venice. While imprisoned in a Genovese prison, Marco Polo wrote about his travels to Rusticelli in his book entitled *Il Milione*. The oldest description of the battle is kept in the National Library in Paris.

The Old town is known for its medieval urban architecture. The main street stretches through the town centre dividing it into the eastern and western part. It is laid out in the form of a fishbone. The streets were planned in such a way that the winds blowing from the sea always pass through the town. The town used to be surrounded by high walls built in the 13th, 14th and 15th century.

In Korčula, stonemasonry and shipbuilding have been the two most important trades since ancient times. The high-quality stone from the Korčula quarries (known as *kave*) was well-known and was exported all around the World. In the 15th and 16th century, Italian and local builders built richly decorated palaces and churches. The master builder Marko Andrijić from Korčula completed the St. Mark's Cathedral bell tower and canopy above the main altar. The altarpiece was painted by the Italian artist Jacopo Tintoretto.

The *Moreška* sword dance has been passed down from generation to generation for centuries. It has become an essential part of the cultural and tourist offer of the Town of Korčula during the summer months. *Moreška* is protected as intangible cultural heritage of the Republic of Croatia, together with *Kumpanija* that is performed in Pupnat, Čara, Smokvica, Blato and Vela Luka. The *Moštra* sword dance is performed in Žrnovo. The oldest written document on *Moreška* dates back to the year 1666 and the Law on *Kumpanija* from Žrnovo dates back to 1620.

#GradKorčula

Grad Korčula jedan je od najbolje očuvanih srednjovjekovnih gradova Sredozemlja i tradicionalno turističko i kulturno središte otoka Korčule.

Smješten je na sjeveroistočnom dijelu istoimenog otoka te zajedno sa svojim naseljima Čarom, Račišćem, Pupnatom i Žrnovom broji oko 5.700 stanovnika. Od Poluotoka Pelješca udaljen je 1.270 metara i s njim je izvrsno povezan svakodnevnim trajektnim i katamaranskom linijama.

Korčula je rodno mjesto Marka Pola (1254-1324). Slavni Marko Polo je zarobljen tijekom pomorske bitke između Genove i Venecije koja se održala u korčulanskom arhipelagu 7.9.1298. U denoveškom zatvoru pripovijeda pisaru Rusticcelliju o svojim putovanjima na Daleki istok i tako nastaje knjiga „Il Milione“. Najstariji opis bitke čuva se u Nacionalnoj biblioteci u Parizu.

Stari grad poznat je po svojoj srednjovjekovnoj urbanoj arhitekturi. Glavna ulica proteže se kroz središte te razdvaja istočni i zapadni dio grada. Struktura podsjeća na riblju kost. Ulice su planirane tako da vjetar s mora uvijek struji kroz grad. Grad Korčula bio je okružen zidinama i kulama iz 13., 14. i 15. stoljeća.

Grad Korčula / Town of Korčula (M. Šain)

#Korčula

Kamenoklesarstvo i brodogradnja od davnina su najvažniji korčulanski zanati. Kvalitetan kamen iz korčulanskih „kava“ bio je nadaleko poznat i izvezio se po cijelome svijetu. U 15. i 16. stoljeću talijanski i domaći graditelji podižu bogato ukrašene palače i crkve. Majstor-graditelj Korčulanin Marko Andrijić dovršio je zvonik i podigao nebnicu nad glavnim oltarom Katedrale sv. Marka s oltarnom palom talijanskog umjetnika Jacopa Tintoretta.

Viteška igra *moreška* stoljećima se prenosi iz naraštaja u naraštaj i postala je nezaobilazni dio kulturne i turističke ponude grada Korčule u ljetnom periodu. Na Listi zaštićenih kulturnih dobara Republike Hrvatske se uz *morešku* nalazi i lančani ples od boja s mačevima - *kumpanija*, koja se izvodi u Pupnatu, Čaru, Smokvici, Blatu i Veloj Luci te *moštra* koja se pleše u Žrnovu, na otoku Korčuli. Najstariji zapis o *morešci* potječe iz 1666. godine a *Zakon kumpanije* iz Žrnova datira iz 1620. godine.

In the vicinity of Čara, an export seaport was built in Zavalatica, which is a tourist site today.

The neighbouring bays with pebble beaches, such as Žitna and Čavića Luka are suitable for the vacation of families with children.

Nedaleko od Čare razvila se u prošlosti izvozna vinska luka Zavalatica u kojoj je danas velika ponuda privatnog smještaja.

Obližnje uvale s manjim šljunčanim plažama poput Žitne i Čavića Luke pogodne su za obiteljski odmor s djecom.

#BRNA

Brna is situated on the southern side of the Island of Korčula in a beautiful bay surrounded by lush vegetation and bathed in sunlight. On the western side, the Mali Zaglav Peninsula separates Brna from the Istruga Bay. On the south-eastern side, there are several pebble beaches surrounded by pine trees and the blue sea. During the summer, *Mistral*, the wind blowing from the west, invites the sailors to the high seas. As a deep and well-protected bay, Brna is very popular among sailors for the berthing of yachts and ships.

According to a legend, on his travels, Odyssey visited Brna, stopped in front of the bay and enjoyed its beauty for several days. Some say that sirens who hide under the sea and sunbathe in the nearby bays kept him company.

Nalazi se u podnožju spojenih brda Vele i Male obale, zaklonjena od vjetrova i otvorena prema suncu i moru, na mjestu gdje je otok najširi i reljefno najraznovrsniji. Ispresijecana je prapovijesnim klancima i antičkim putovima te okružena vinogradima i maslinicima. Kamene kuće, idilične ulice, bogata kulturna baština, stoljetni vinogradi i maslinici čari su tog otočnog mjesta koje vas svakim trenutkom vraćaju u neka davna vremena.

Brna se nalazi na južnoj strani otoka Korčule u prekrasnoj uvali okruženoj zelenilom i okupanoj suncem. Na zapadnoj strani, poluotok Mali Zaglav dijeli Brnu od uvale Istruga, a na jugoistočnoj strani više je šljunčanih uvala okruženih borovom šumom i plavetnilom mora. Ljeti često puše osvježavajući zapadni vjetar maestral pa je idealna za ljubitelje jedrenja. Kao dubok i zaštićen zaljev, Brna je sigurna za pristajanje brodova i jahti te je omiljena luka nautičarima.

Legenda kaže da je Odisej na svojim putovanjima posjetio Brnu te se ispred uvale usidrio na nekoliko dana i uživao u ljepotama. Društvo su mu tada mogle praviti morske sirene koje se prema legendi kriju u podmorju te se sunčaju u obližnjim uvalama, skrivene od pogleda

#VISIT VELA LUKA

Follow us #visitvelaluka
@visitvelaluka

Vela Luka is a place of inspiration for many artists. It is the most recent and the largest place on the Island. It is located on the western side of the Island with a deep, well protected bay, providing a safe mooring of vessels in the nautical seaport.

At the entrance to the bay, there is Proizd, an islet with one of the most beautiful beaches on the Mediterranean. In the bay itself, you will be amazed by the islet named Ošjak. Vela Luka is a paradise for all those who love nature. Pristine vegetation, surrounded by a crystal-clear sea, dense pine forests, olive groves, are among the beautiful sights that make Vela Luka a must-see destination.

Vela Luka is a cradle of the a cappella (cro. *klapa*) singing, as well as the birth place, and the final resting place of the famous Croatian singer Oliver Dragojević. Many of his songs are about Vela Luka, the most famous one being *Sjećanje na Velu Luku* (The Remembrance of Vela Luka), one of the most beautiful and the most frequently performed Croatian songs of all time.

The one who comes to Vela Luka once will always return.

WHAT TO SEE AND VISIT

- Vela Spila archaeological cave,
- Culture centre – keeps and represents the historical, cultural and artistic heritage of Vela Luka with valuable museum collections, such as: the archaeological collection, the collection of graphics and small sculptures, and the collection of wooden models of ships,

#VISIT VELA LUKA

Pratite nas #visitvelaluka @ visitvelaluka

Vela Luka je mjesto inspiracije mnogih umjetnika, najmlađe i najveće mjesto na otoku. Smještena je na zapadnoj strani otoka u dubokom, zaštićenom zaljevu te je zbog svojeg položaja sigurno sidrište i luka za nautičare.

Na ulazu u zaljev nalazi se otočić Proizd, jedna od najljepših plaža Mediterana, a u samom zaljevu očarat će vas otok ljubavi, puno puta opjevani otok Ošjak. Vela Luka raj je za zaljubljenike u prirodu. Netaknuta oaza, okružena bistrim morem, gustom borovom šumom, nepregledni maslinici, kristalno čisto more, samo su neke od mnoštva ljepota koje Vela Luka čine nezaobilaznim odredištem.

Vela Luka je kolijevka klapske pjesme, ali i rodno mjesto te posljednje počivalište velikog Olivera Dragojevića. Mnoge pjesme pjevaju o Veloj Luci, ali zasigurno ona najpoznatija, „Sjećanje na Velu Luku“, jedna je od najljepših i najizvođenijih hrvatskih pjesama uopće.

Onaj tko jednom dođe u Velu Luku, uvijek joj se vraća. Posjetite nas i uvjerite se što je to što vas zauvijek veže za Velu Luku!
